UNIQUE PATENTED TECHNOLOGY

BODY MASSAGER WITH A SPRING DIAMETER OF 1.5 CM (THIN)

The spring and inner rod are made of titanium alloy.

For a massager with a spring diameter of 1.5 centimeters (thin), IMPACT is STRONGER in relation to a massager with a spring diameter of 2.0 centimeters.

BODY MASSAGER WITH A SPRING DIAMETER OF 2.0 CM (STANDARD)

The spring and inner rod are made of titanium alloy.

A DAILY MASSAGE WILL ALLOW YOU TO FORGET ABOUT PAIN AND LIVE LIFE TO THE FULLEST

The latest development is a spring made of titanium alloy with titanium inner rod. The handles are made of durable plastic.

The massager is used both in the massage itself and by professional massage therapists for therapeutic and prophylactic purposes.

BODY MASSAGER WITH A SPRING DIAMETER OF 1.5 cm

BODY MASSAGER WITH A SPRING DIAMETER OF 1.5 cm

PATENTED SPRING BODY MASSAGER
TITANIUM ALLOY ANTICELLULITE &
THERAPEUTIC

ITEM SPECIFICS

MATERIAL: Titanium alloy

COLOUR: Silver

TYPE: Anti-Cellulite Massager

LABELS & CERTIFICATIONS: EU patent

BODY AREA: Arm, Back, Foot, Full Body, Hand, Legs,
Neck, Shoulder

COUNTRY/REGION OF MANUFACTURE: Ukraine

ITEM WEIGHT: 0.35 kg

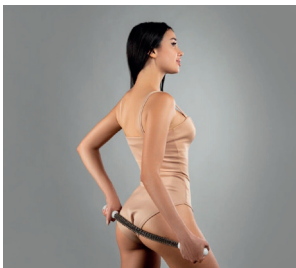

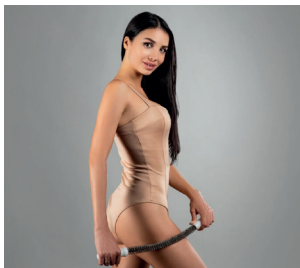

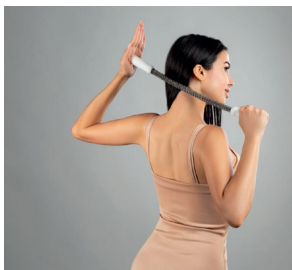

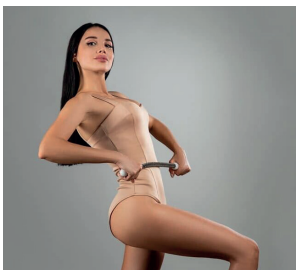

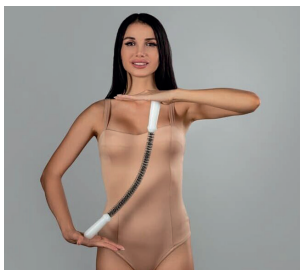

MASSAGE FUNCTIONS: Kneading, Pain Relief,
Rolling

ITEM LENGTH: 53 cm

ITEM HEIGHT: 3 cm

ITEM WIDTH: 9 cm

FEATURES: Handheld, Hypoallergenic, Light-
weight, Manual, Waterproof

ITEM DESCRIPTION

INARI SPRING MASSAGER TITANIUM ALLOY THIN (SPRING DIAMETER 1,5 cm), 1 UNIT

Original, protected by patents, which is confirmed by the holographic mark on the handle of the massager. Beware of fakes!

Improved quality: spring and core made of titanium alloy

- Length 53 cm
- The diameter of the spring is 1,5 cm (2 cm)
- Ease of use, high-quality processing of muscle and subcutaneous fat tissue
- Ease of washing and disinfection

For a massager with a spring diameter of 1.5 centimeters (thin), IMPACT is STRONGER in relation to a massager with a spring diameter of 2.0 centimeters.

Features of use: The massager is used both in self-massage and by professional massage therapists, for therapeutic and preventive purposes.

Feature: ease of use, high-quality processing of muscle and subcutaneous fat tissue. Able to quickly and effectively massage the tissue, it has a wide range of possibilities of influencing the subcutaneous fat layer, which allows you to successfully use this massager to solve the problems of figure correction.

As a result of massage (self-massage), muscle fibers restore their contractility, thereby optimizing muscle tone.

This massager is used in classical, sports, therapeutic, segmental - reflex massage, as well as in anti-cellulite programs. See the basic techniques of working with the INARY massager in the training video course is available upon request.

Advantages of the model: Completely made of medical grade titanium alloy. This allows you to use this massager with an individual allergic reaction to zinc. The massager is specially designed taking into account modern requirements for ergonomics (total length: 53 cm, diameter of the working surface: 1,5 cm or 2 cm). The dimensions, shape and material of manufacture ensure maximum convenience in work, as well as ease of hygienic and disinfecting treatment of the massager (you can wash with soap or use any disinfectant).

Areas of application: Feet, calf muscles, thighs, buttocks, lower back, back, cervical-cell zone.

Dosage: before the appearance of heat or redness (mechanical dosage on any part of the body).

Designed and produced in Ukraine.

spring diameter of 1.5 centimeters (thin)

spring diameter of 2.0 centimeters

ITEM DESCRIPTION

INARI SET OF SPRING FACE MASSAGERS (BOX OF 2 PATENTED TITANIUM ALLOY ROLLERS)

Original Inari massagers, protected by patents, confirmed by the holographic mark on the packaging. Beware of fakes!

- Spring and inner rod made of stainless steel.
- The set includes two massagers: thin (provides a more intense effect) and thick.
- The price is per set.
- Improves blood circulation, lifting, lymphatic drainage.

- Easy to use, high-quality treatment of muscle and subcutaneous fat tissue
- Easy to clean and disinfect

The massager is used both in self-massage and by professional massage therapists, for therapeutic and preventive purposes.

FEATURE: ease of use, high-quality treatment of muscle and subcutaneous fat tissue. It is able to quickly and effectively massage tissue and has a wide range of possibilities for influencing the subcutaneous fat layer, which allows this massager to be successfully used for massage procedures on the face, neck and décolleté.

As a result of massage (self-massage), muscle fibers restore contractility, thereby optimizing muscle tone.

ADVANTAGES OF THE MODEL: completely made of medical grade titanium alloy. This allows you to use this massager if you have an individual allergic reaction to zinc. The massager is specially designed to meet modern ergonomic requirements. The dimensions, shape and material of manufacture ensure maximum ease of use, as well as ease of hygienic and disinfection treatment of the massager (you can wash it with soap or use any disinfectants).

AREAS OF APPLICATION: Face, décolleté, neck and collar area.

DOSAGE: until warmth or redness appears (mechanical dosage on any part of the body).

PACKAGING: 2 ready-to-use massagers in a cardboard box.
